SUMMARY

Results-oriented Senior Software Engineer with 6 years of experience building microservices, REST APIs and scalable backend platforms with Python, FastAPI, Docker, PostgreSQL and AWS.

TECHNICAL SKILLS

Python, FastAPI, Flask, Docker, Kubernetes, PostgreSQL, SQL, REST APIs, Git, AWS, Linux, JavaScript, HTML, CSS, Redis, Jenkins

SOFT SKILLS

Leadership, Communication, Problem Solving, Teamwork, Agile, Mentoring

EXPERIENCE

TechStream Solutions - Senior Backend Developer 2022 - Present

- Architected RESTful microservices processing 10M daily transactions.
- Optimized SQL query performance reducing endpoint latency by 45%.
- Mentored four junior developers through code review and pairing sessions.

DataPulse Inc - Software Developer 2020 - 2022

- Developed backend features using Python and Flask for a payments platform.
- Integrated third-party payment gateways and webhook services.
- Containerized services with Docker and deployed to AWS ECS.

EDUCATION

University of California, Berkeley - B.S. in Computer Science - 2020

PROJECTS

Kubernetes Cost Optimizer - Python, FastAPI, Kubernetes, Prometheus.
Built a Helm-deployed controller that scales idle pods and cut spend 22%.
